1 What We Do

Proportional Lime Type Foundry provides high quality fonts, whether based on historical exemplars and accurately "recut" for the digital age, or more experimental typefaces. This foundry strives to maintain a high standard of excellence and will certainly make any necessary adjustments to existing fonts should it be desired. If it is found that some obscure character is absent; a request for such an addition will be considered, and implemented at no charge. We wish to give our world wide customer base the best products that we can make. These excellent and diverse fonts can be obtained at both Creative Market and Myfonts.
